

Single Phase UPS Battery Replacement

BENEFITS

Vertiv offers you the possibility to perform the battery replacement on your own or to have us do it for you based on your needs.

Autonomous Replacement

With autonomous-replacement you will be able to grant maximum power continuity to your connected loads by simply purchasing the right battery kit for your Liebert® GXT UPS.

Vertiv Battery Replacement Service

With our battery replacement service we take care of the heavy lifting for you.

By replacing your UPS batteries, you will benefit from:

- Continuity and availability of UPS battery system
- Power continuity to critical loads
- Maximum battery runtime
- UPS optimal performance throughout its entire lifetime
- Maintaining the best performance for your business applications
- Simplified small site UPS deployment and maintenance
- Improved and hassle-free power protection
- Maintenance and replacement programs serviced by our trained Customer Engineers
- Expert Vertiv technicians' advice after UPS health check.

Ensure your UPS battery provides you with the required runtime, at any time.

The battery is a key element in every UPS and it is critical to grant power continuity to all connected loads, should a power outage occur. Correct UPS usage and maintenance, together with battery replacement at the right time, are essential for smooth and uninterrupted operation in every critical facility from core to edge.

We help you maintain your edge applications with the battery kit replacement options available for Liebert GXT UPS. Following the indications in the Technical Specification Table, you can simply purchase the right replacement battery kit for your UPS and have your technicians perform the

replacement (**Autonomous Replacement**), or purchase the complete battery replacement as well, and have us perform it for you (**Vertiv Battery Replacement Service**).

The Vertiv Battery Replacement option includes old battery replacement together with a preventive maintenance visit. This means a UPS health check will be carried out to ensure the unit is still performing at its optimal conditions and ensure it reaches its maximum lifetime.

Vertiv Battery Replacement is available in a select number of countries, please check if yours is among them with your local Vertiv representative.
